

# Ideation Phase

## Define the Problem Statements

<b>DATE</b>	08 November 2022
<b>TEAM ID</b>	PNT2022TMID13278
<b>PROJECT TITLE</b>	University Admit Eligibility Predictor
<b>MAXIMUM MARK</b>	2 Marks

<b>Problem Statement (PS):</b>	The aim of this project is to help students in shortlisting universities with their profiles. The predicted output gives them a fair idea about their admission chances to a particular university. This analysis should also help students who are currently preparing or will be preparing to get a better idea.
<b>I am (USER)</b>	The goal of getting into a reputable institution and a career-oriented university is furthered by a user who has access to the entire collection of data for all universities based on his or her preparation for university entrance and eligibility requirements.
<b>I'm trying to</b>	Attempt to set up the user so that they actively participate in choosing their career by selecting a suitable institution or university.
<b>But</b>	I doubt the user will be accepted to the university of choice.
<b>Because</b>	Of the low marks, it is uncertain if they will be admitted to the university.
<b>Which makes me feel</b>	Depressed and angry because they were denied admittance to their dream schools, they spent a lot of time and money, and they lacked knowledge.
