

Project Design Phase-I

Solution Architecture

DATE	08 November 2022
TEAM ID	PNT2022TMID13278
PROJECT TITLE	University Admit Eligibility Predictor
MAXIMUM MARK	4 Marks

Solution Architecture:

Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
